## EDUCATION

---

### American University of Ras Al Khaimah - B.S. Computer Engineering

Ras Al Khaimah, UAE | GPA: 3.66/4.00 | Dean's List | Expected May 2027

- Relevant coursework: C/C++, Data Structures and Algorithms, Digital Systems Design, Computer Architecture, Database Systems, Operating Systems, Microprocessors and Embedded Systems, Data Communications and Networking.

## EXPERIENCE

---

### Salesforce Developer Intern - Ras Al Khaimah Economic Zone (RAKEZ)

Ras Al Khaimah, UAE | May 2026 - Present

- Build and maintain Salesforce data models, object schemas, and CRM automation flows supporting enterprise-scale business operations.
- Designed Lead-to-Opportunity conversion pipelines and automation flows that reduce manual handoff steps across business units.
- Completed Salesforce Trailhead CRM Basics and Admin Beginner pathways while working directly in a production Salesforce org.

### IT Department Intern - Ras Al Khaimah Hospital

Ras Al Khaimah, UAE | May 2024 - Aug 2024

- Administered hospital management software across clinical and administrative departments, supporting uptime and patient-facing workflows.
- Wrote SQL queries to retrieve, filter, and cross-reference patient records while applying relational database concepts under mentor supervision.
- Conducted scheduled hardware and software audits, diagnosed faults, replaced peripherals, and maintained service logs.

### Student Assistant - Sports and Recreation, AURAK

Ras Al Khaimah, UAE | May 2025 - Present

- Prepared and managed an approximately AED 66,000 annual sports and recreation budget across Fall, Spring, and Summer programming.
- Organized campus-wide competitions across table tennis, PlayStation FIFA, chess, and pool, coordinating logistics and student engagement.

### Men's Volleyball Team Captain - AURAK

Ras Al Khaimah, UAE | Sep 2024 - Present

- Led AURAK's men's volleyball team to its first championship trophy in program history while managing training, conflict resolution, and player development.

## PROJECTS

---

### Goonodoro - Full-Stack Pomodoro Web App

*Creator | Node.js, Express, PostgreSQL, Neon, Railway, Vercel, JWT, Resend | 2026*

- Built a production Pomodoro app with plain HTML/CSS/JS frontend, Express backend, JWT auth, verified email flow, protected session tracking, and public leaderboard.
- Designed PostgreSQL schema for users and sessions, deployed backend on Railway, configured CORS/rate limiting, and documented API endpoints for public GitHub review.

### Markdown Screenshot - Tauri Desktop Screenshot App

*Creator | Rust, Tauri v2, React, TypeScript, xcap | 2026*

- Built a Windows-first desktop tray app with global Ctrl+Shift+S hotkey, transparent region-selection overlay, real native PNG capture, and clipboard Markdown output.
- Packaged the app with Tauri installers and documented the architecture, commands, platform notes, and multi-phase roadmap in a public GitHub repository.

### Sound-Activated Lighting System - STM32 Embedded

*Hardware and Firmware Lead | STM32L476VG, ARM Cortex-M4, ADC, GPIO | Jan 2026 - Apr 2026*

- Implemented real-time clap detection using a Gravity analog sound sensor via 12-bit ADC and GPIO-driven LED output on PB2.
- Configured ADC1 continuous conversion, calibrated threshold from oscilloscope waveform analysis, and achieved sub-10 ms response with debounce handling.

### Linux Kernel Internals - Live System Analysis

*Systems Analyst and Author | Debian, VirtualBox, strace, htop, stress-ng | Jan 2026 - Apr 2026*

- Analyzed process scheduling, synchronization primitives, memory management, kernel architecture, and Linux Security Modules using live Debian experiments.
- Traced clone and execve system calls and stress-tested CPU and memory subsystems to validate scheduler and allocator behavior.

### 4x4 Array Multiplier - VHDL and FPGA

*Team Leader | Quartus, ModelSim, DE2-115 FPGA | Oct 2025 - Dec 2025*

- Designed and verified a VHDL multiplier using partial products and full-adder networks, then deployed it on physical FPGA hardware.

### Tutoring Center Relational Database

*Team Member | MySQL, normalization, schema design | Oct 2025 - Dec 2025*

- Designed a normalized MySQL database through requirements analysis, schema design, and anomaly elimination across 1NF to 3NF.

## CERTIFICATIONS

---

Introduction to Microprocessors - Arm (Coursera), 2026 | Embedded Systems using C - EDUCBA (Coursera), 2026 | Basics of Embedded Systems - Ansys, 2026 | Operating Systems - BITS Pilani (Coursera), 2026 | Networking Basics - Cisco Networking Academy, 2026 | Salesforce CRM Basics and Admin Beginner - Salesforce Trailhead, 2026 | Technical Knowledge: Cybersecurity and Digital Knowledge: Artificial Intelligence - Accenture, 2026 | ISC2 Candidate - ISC2, 2025

## TECHNICAL SKILLS

---

**Languages:** C, C++, Embedded C, Java, JavaScript, TypeScript, Rust, SQL, Bash, VHDL

**Full Stack:** Node.js, Express, REST APIs, JWT auth, PostgreSQL, Neon, Railway, Vercel, Resend, HTML/CSS/JS

**Desktop:** Tauri v2, React, native screenshot capture, global hotkeys, system tray apps, clipboard integration

**Embedded and Hardware:** STM32L476, ARM Cortex-M4, 12-bit ADC, GPIO/DMA, FPGA, Quartus, ModelSim, Keil uVision, oscilloscope analysis

**Systems and Tools:** Linux, Git/GitHub, VirtualBox, strace, htop, stress-ng, Wireshark, Cisco Packet Tracer, LaTeX

**Cloud and CRM:** Salesforce data modelling, Flow Builder, Lead-to-Opportunity automation, CRM architecture
